

## CONSTRUCTION NOTICE

### Chautauqua Waterline (Lindsey Street to Timberdell Road)

The Chautauqua Waterline project between Lindsey Street and Timberdell Road will enhance water pressure and firefighting capabilities. The new 24-inch PVC waterline replaces smaller, older ductile iron piping originally installed over 60 years ago. This work is a continuation of the Segment D Waterline project recommended for construction in 2003. This project will install a southern water supply loop beginning near 12<sup>th</sup> Avenue SE and Highway 9 and ending near I-35 and Lindsey.

The waterline along Lindsey Street between 24<sup>th</sup> Avenue SW and Chautauqua Avenue was completed in May 2016 at a construction cost of \$4,126,300.

This project was completed in preparation for the ongoing Lindsey Street widening project.

24-inch waterline installation on Chautauqua Avenue between Lindsey Street and Timberdell Road will begin around June 15, 2017. Initially, Chautauqua will be closed to through traffic between Lindsey and Hoover; additionally, Wilson and Hoover west of Chautauqua will also be closed. Local traffic only in the northbound direction on Chautauqua may occur as construction allows; local northbound traffic on Chautauqua will be allowed when construction is not in progress. Temporary driveway access will be provided each evening via a gravel road surface.

After completion of waterline installation between Lindsey and Hoover, the block between Hoover and Elmwood will be closed in a similar manner.

After completion of waterline installation to Elmwood, the waterline will be pressure tested and placed into service following bacteriological sampling. Reconstruction of the pavement between Lindsey and Elmwood will then begin as waterline installation continues to the south of Elmwood to Timberdell.

### CONSTRUCTION TIME FRAME

June 15, 2017 to August 17, 2017 (dates are projected as accurately as possible, but are subject to change).

### PROJECT SUMMARY

The project includes:

- Installation of a new 24-inch water transmission line for Norman
- Installation of a new 16-inch water transmission line for OU
- Re-connection of new to existing waterlines at adjoining side streets and homes
- Reconstruction of southbound pavement in Chautauqua and impacted sidewalks
